SSC
ANSS Inter College

07/2009 – 06/2010   *63%*

SKILLS

CSS Flask HTML Javascript MySQL Python ReactJS Redux

PERSONAL PROJECTS

Truck Share (01/2020 – 01/2020)

- This is a web app where a user can order their goods to be moved on particular destination and by using live location a near by moving truck.Truck will be moving fully loaded goods.So we will able to reduce the traffic on highways as well as the hefty amount user has to pay will be reduced.
- Technologies are used in app React, Firebase, Material-UI and Bootsrap

Bus Management WebApp (For Admin) (03/2020 – 03/202)

- I have create this web app for Bus Management system.This is an end to end CRUD.In this web app user can add, edit, delete and read their bus, cities (source and destination) and other details.
- Technologies are used for frontend React, Redux, React-Redux, React-thunk, Material-UI, Bootstrap and for backend Flask, MySql.

Movie Show (11/2019 – 11/2019)

- This is my first project in Masai School. In the project I have used OMBD API for movies . User can search movies in web app.
- Technologies are used like HTML5, CSS, BootStrap, Javascript, and AJAX.

Bank Customer Management (01/2020 – 01/202)

- This is a CRUD application with basic authentication.
- The technologies used here are Bootstrap, Material-UI, React, Redux, and React-Redux.
